Notes:

SVG 1.0 released September 2001.

SVG 1.1 current standard format, released August 2011.

SVG 2 not released yet, spec shows more integration with web CSS, HTML5 and WOFF.

SVG Tiny 1.1 doesn't support gradients, transparency, clipping, masks, symbols, patterns, underline text, strike-through text, vertical text, or SVG filter effects.

SVG Tiny 1.2 released December 2008.

SVG BASIC 1.1 designed for smart phones, doesn't support non-rectangular clipping and some SVG filter effects.

† SVG embedded fonts remain editable and must be installed on computer to display correctly.
